PROFILE

Detail-oriented Frontend Developer with hands-on experience in React.js, Next.js, and Shopify theme development, specializing in API integration, workflow automation, and e-commerce storefront customization. Proven ability to build responsive user interfaces, integrate third-party services using REST APIs, Webhooks, and OAuth, and automate business processes using n8n. Strong foundation in system integrations, database connectivity, and authentication flows.

EXPERIENCE

AI & Automation Developer, *ZappLocal Technologies* 02/2026 – Present

- Built AI-powered automation workflows for social media and customer communication platforms.
- Developed WhatsApp chatbot systems for automated customer support and lead handling.
- Created automated content creation and publishing pipelines for Instagram, LinkedIn, Facebook, and X.
- Integrated APIs and webhooks to enable seamless multi-platform automation workflows.
- Implemented AI-assisted content generation and scheduling systems for marketing automation.

Software - Developer, *Lumbee International PVT. LTD.* 07/2025 – 01/2026

- Designed and implemented API-based integrations between internal systems and third-party platforms using webhooks and automation tools.
- Built and maintained modular automation workflows to ensure reliable data synchronization across multiple applications.
- Automated CRM workflows by integrating frontend interfaces, backend logic, and external services, reducing manual operations and improving system efficiency.
- Implemented error handling, validation, and fallback logic to improve workflow reliability and uptime.
- Collaborated closely with product, frontend, and operations teams to align integration logic with business requirements.
- Monitored and optimized automation workflows to improve performance, reduce latency, and ensure data accuracy.
- Managed structured datasets using Supabase and Airtable, ensuring secure access and consistent data flow across systems.

EDUCATION

Bachelor of Computer Application, *SGT University* 08/2024 – Present

SKILLS

Frontend Development

- React
- Next.js
- Tailwind CSS
- JavaScript
- TypeScript

Databases

- Supabase
- Airtable
- MongoDB

E-commerce Development

- Shopify Theme Development
- Liquid (Shopify templating)
- Storefront customization

Backend & System Concepts

- System integrations
- Error handling & retries
- Data consistency basics

APIs & Integrations

- REST APIs
- Webhooks
- OAuth
- API Testing (Postman)

Programming Languages

Python

Automation & Workflow Tools

- N8N
- Trigger.dev
- Softr (No-Code Development)
- Workflow automation (webhooks, async jobs)

Developer Tools & Platforms

GitHub

PROJECTS

Client Portal with Secure Authentication, *Tech: React.js, APIs, Authentication* 09/2025 – 10/2025

- Built responsive frontend using React.js and Tailwind CSS
- Implemented role-based authentication system
- Integrated external services via REST API integration

E-commerce Shopify Store Customization, *Tech: Shopify, Liquid, JavaScript* 08/2025 – 09/2025

- Developed and customized Shopify themes using Liquid templating language
- Modified storefront UI, sections, and schema for dynamic product display
- Improved user experience through responsive design and layout optimization

Workflow Automation System, *Tech: n8n, Webhooks, Airtable* 07/2025 – 08/2025

- Designed automated workflows using n8n
- Connected applications using Webhooks and REST APIs
- Automated data sync between platforms

TECHNICAL EXPOSURE

- Built responsive web applications using React.js, Next.js, and Tailwind CSS
- Worked on Shopify theme customization using Liquid templating language
- Integrated third-party services via REST APIs and Webhooks
- Implemented authentication flows and role-based access systems
- Designed and automated workflows using n8n for business process automation
- Performed API testing and debugging using Postman
- Managed structured data using Supabase and Airtable
- Worked with event-driven automation and async job processing
- Used Git and GitHub for version control and collaboration
